

KNOW YOUR CLAY BRICKS

FBX		NFP	
FACE BRICK EXTRA		NON-FACING PLASTERED	
<p>Clay bricks that are selected or produced for their durability and high degree of uniformity of size, shape and colour</p>		<p>Clay bricks suitable for general building work that is to be plastered</p>	
FBS		NFX	
FACE BRICK STANDARD		NON-FACING EXTRA	
<p>Clay bricks that are selected or produced for their durability and uniformity of size and shape</p>		<p>Clay bricks suitable for use, plastered or unplastered, for general building work below damp-proof course or under damp conditions or below ground level where durability rather than aesthetics is the criterion for selection</p>	
FBA		E	
FACE BRICK AESTHETIC		ENGINEERING UNITS	
<p>Clay bricks that are selected or produced for their durability and aesthetic effect deriving from non-uniformity of size, shape, or colour</p>		<p>Any class masonry unit produced for structural or load-bearing purposes in face or non-face work, where the manufacturer supplies clay bricks to an agreed compressive strength. An engineering unit is designated by the addition of the letter E followed by a number equal to the nominal compressive strength in megapascals, e.g. FBSE21</p>	
PA		PB	
CLAY PAVERS		CLAY PAVERS	
<p>Clay pavers that are selected or produced for their durability and for a high degree of uniformity in size and shape, and that have dimensions such that the ratio of work size length to work size width is approximately 1:1;2:1 or 3:1.</p>		<p>Clay pavers that are selected or produced for their durability and for their uniformity in size and shape.</p>	

NOTE: Pictures depicted are for example only and may differ in size, shape and colour to actual products supplied.
